

CMSMS - Harris's Basic Underground Route Plan for Visitors & Guidance for Leaders

At all Times

- Maintain an awareness of risks and hazards and take mental notes of changes.
- Keep a count of visitor numbers

At Ground Level

- Health, Safety, Emergency and Rules talk.
- The leader leads the way, in a group always have an adult follow last.
- Check all visitors are confident, comfortable and understand the safety and rules.
- Ensure access token moved on in/out board.

Below Ground

- At any point if someone wishes to exit, either all the group must exit, or those that stay must remain at the same point and await the return of the leader.
- Offer advice as descending, have advice moved upwards to next person and so on.
- Keep the group together.
- Keep count of the visitors before moving on.

Under Ground Route.

- Descend ladders until the 15 fathoms, check hatch to lower levels is closed.
- There is **NO** access below the 15 fathom level.
- Wait at E/W Junction for all of group.
- Head along 15 fathom West to end and return to E/W Junction
- Head along 15 fathom East to end. **NO** entry into stopes allowed, other than looking in from top of ladders. All cross cuts are safe to access. Return to E/W Junction
- Head up ladder into old workings and make way back to shaft at 6 fathom level
- Exit Harris's
- Check all tokens are returned and ensure all visitors are present.
